

## **A-8 EDUCATIONAL PHILOSOPHY**

The Board of School Trustees of the Plainfield Community School Corporation subscribes to the thesis that the educational aspirations for the young have made us free, and it is the intent of the Board to perpetuate that freedom by providing the best education possible for the children of the community.

The purpose of public school education is to consider each student's spiritual, emotional, physical, social and economic well-being as well as the academic preparations which help to develop an individual to assume a role in the future of our free democratic society.

The Board of School Trustees will attempt to provide programs for the varied interests of the students of the schools. Such attempts will keep in mind that quality of program deserves as much consideration as quantity of programs. The Board accepts the premise that the center of the school curriculum is the student and that the instructional program should fit an appropriate developmental pattern of education.

The Board of School Trustees accepts the conclusion that the education of students is a comprehensive program which must be undertaken in cooperation with other institutions of our society and will seek to establish and maintain strong ties with the parents and community programs.
