

E-10 TRANSPORTATION SERVICES MANAGEMENT

The Board of School Trustees will provide a transportation system organized to provide school transportation services for eligible students based on safety, efficiency, adequacy, and economy. Contracts will be signed with the qualified drivers as required by law. Through the use of corporation owned buses, the following shall be taken into consideration in developing the school transportation system:

1. Every school bus ride in itself is a learning experience and the school bus ride should also leave students in the proper frame of mind to take full advantage of the instructional program offered.
2. The Board shall establish its school bus system to conform to or exceed the minimum standards as set forth by the state.
