

I-28 INSTRUCTIONAL RESOURCES

The Board of School Trustees believes that personnel and materials appropriate to the needs of the school program must be available to each student and teacher. Available district resources shall be allocated to schools on an equitable basis, recognizing district policies, financial ability, and school needs.

The Board further believes that:

1. To provide each student with learning experiences suited to his or her aptitudes, interests, maturity, and competence in each subject area, instructional arrangements, equipment, and accommodations based on individual needs are necessary.
2. Teachers and administrators should be assisted in their tasks by instructional assistants and by other professional resource persons bringing their particular background to bear on curriculum concerns, educational procedures, and individual student needs.
