

I-34 MEDIA CENTERS

The Board believes that media centers are a fundamental part of the educational process. The availability of many materials in a variety of formats presents to students and teachers the possibility of selecting the media best suited for individual need and mode of learning.

Therefore, the schools of the district shall maintain media centers where students and staff members are exposed to a variety of books, periodicals, and references in printed form as well as to a variety of new materials such as databases, E-books, books on tape, DVD's, mp3files, podcasts, and so forth. Provision will be made to enable all school media centers to remain open for use by students during the school day.
