

I-45 TESTING/REMEDIATION PROGRAMS

Plainfield Community School Corporation is taking an active role in helping students pass the End of Course Assessments mandated for student graduation. To assist students in their ability to pass the mandated End of Course Assessments, students will be identified for remediation needs early in their education. Previous ISTEP scores and other achievement testing scores provided by the school will help determine if students need remediation. Remediation may be given in any of the following forms: after school tutorial sessions, summer jump start programs, a second mathematics or language arts class during the school year, or pull out programs. Remediation classes offered during the school year at the middle school and high school may be required by the principal of students who perform at, below, or barely above the state benchmarks and/or local achievement testing standards. This may require forfeiting an elective class for that semester or year. Research indicates that early intervention is the best means of remediation, and it is the goal of Plainfield Community School Corporation to provide early remediation in order to increase the likelihood of the students passing the End of Course Assessments.

Plainfield Schools utilize a variety of summative and formative assessments to measure and monitor the academic progress of students both individually and by groups. Testing results help teachers determine areas for improvement of instruction, find students in need of remediation, and can help parents know how their child is progressing.
