

## I-7 BASIC INSTRUCTIONAL PROGRAM

The curriculum of the Plainfield Community School Corporation shall encompass all the learning experiences planned, guided, and sponsored to meet the needs, the abilities, the interests, and the emerging self-image of each pupil. The curriculum shall be broad in scope and will provide for a wide range in rate, readiness, and potential for learning through a balanced instructional program.

The Board is committed to the importance of reading skill development as the basic element in each pupil's education. The Board also believes that the improvement of specific reading skills of children attending the Plainfield Schools should be continuous.

Therefore, the first priority of the instructional program will be proficiency in reading through a planned sequence of reading skills and language experiences beginning in the kindergarten program and extending through grade eight, with reading and vocabulary instruction integrated into all areas of the curriculum in grades 9-12.

The second priority of the instructional program will be mastery of the fundamentals of the content of mathematics -- number operations, informal algebraic and geometric concepts, and the structure of our number system, beginning in the kindergarten program and continuing through grade eight.

The instructional program also will provide a planned sequence in language arts -- spelling, handwriting, English grammar, composition, literature. There will be a planned sequence in the social studies -- history, geography, civics, economics, world cultures, anthropology, political science, and the other social science disciplines; a planned sequence of science experiences; a planned sequence of fine and practical arts experiences -- art education, vocal and instrumental music, home economics, industrial arts, vocational areas; a planned sequence of health education and safety; and a planned program of physical education. Planned program adaptations will also be made available for exceptional children. The planned program for all children shall also include library instruction, bilingual and multicultural education, individual study, guidance, and other appropriate instructional activities, and all instruction required under state law and State Board of Education regulations.

The ultimate aim of the instructional program of the district shall be the development of proficiency in each student's ability to read well, write legibly, spell accurately, listen attentively, speak clearly, think critically, use basic mathematical computational skills, observe carefully, solve problems, participate effectively in groups, keep healthy, enjoy aesthetic experiences, and understand career development.
