

J-36 SUPERVISION OF STUDENTS

Teachers shall have the responsibility of supervising students during normal school hours and during any extracurricular activities conducted on school property. Principals shall develop playground and/or gymnasium supervision schedules for teachers.

Students shall be under the supervision of bus drivers while riding to and from school on school owned buses.

There are times when a student is not under the direct supervision of a certificated staff member. Any employee who observes student misbehavior is to report this fact to the teacher and/or building principal. If a student's actions could be harmful to himself or to another student, the Board of School Trustees will support all reasonable effort of its employees to secure and maintain orderly conduct on the part of that student.
